

Safe Experiment Planner

Plan, observe, measure and evaluate

This four-page workbook guides a fair test from question and risk assessment through results, conclusion and evaluation. Use adult supervision whenever an activity requires it.

Clear explanations - consistent SI units - ready to print

1. Question and planning

Investigation question

Prediction and scientific reason

Variables

Independent - what I change	Dependent - what I measure	Controlled - what I keep the same

2. Safety and method

Risk assessment

Hazard	Possible harm	Control measure

Numbered method

3. Results and evaluation

Results table - include headings and units

Conclusion supported by evidence

Limitations and improvements
